

RUN WITH THE WIND

A new way for ballooning from Busca – NW of Italy

WHY RUNNING WITH THE WIND?

A great opportunity to open your flight horizons in a unique environment with breathtaking landscapes, travelling long distance emotions

An open sky to fly in an amazing environment

Winds that allow **long distance flights** mainly from **October to March. You can reach Venice in 5 hours**

A **unique emotion** to run the wind.

Ready to take off?

An idea of : Supported by:

Datameteo Educational OdV is a no profit registered association with volunteers, experts in flight and meteorology, able to promote and support on the ground, sports and tourism activities with hot air balloons.

Run safe the wind supported before, during, after the flight

John Aimo Balloons is the balloon operator, with licensed flight school managed by the experienced aerostatic flight instructor John Aimo, with more than 10,500 flying hours and several distance records. Together we would like experiencing the balloon flight in a new way, letting ourselves be carried away and learning to run the wind for long distances in a unique sky

WHERE DO WE TAKE OFF FROM?

Busca Italy (Cuneo)

Latitude: 44 ° 30 '39.229 "N

Longitude: 7 ° 28 '15.450 "E

Altitude above sea level: 499 m

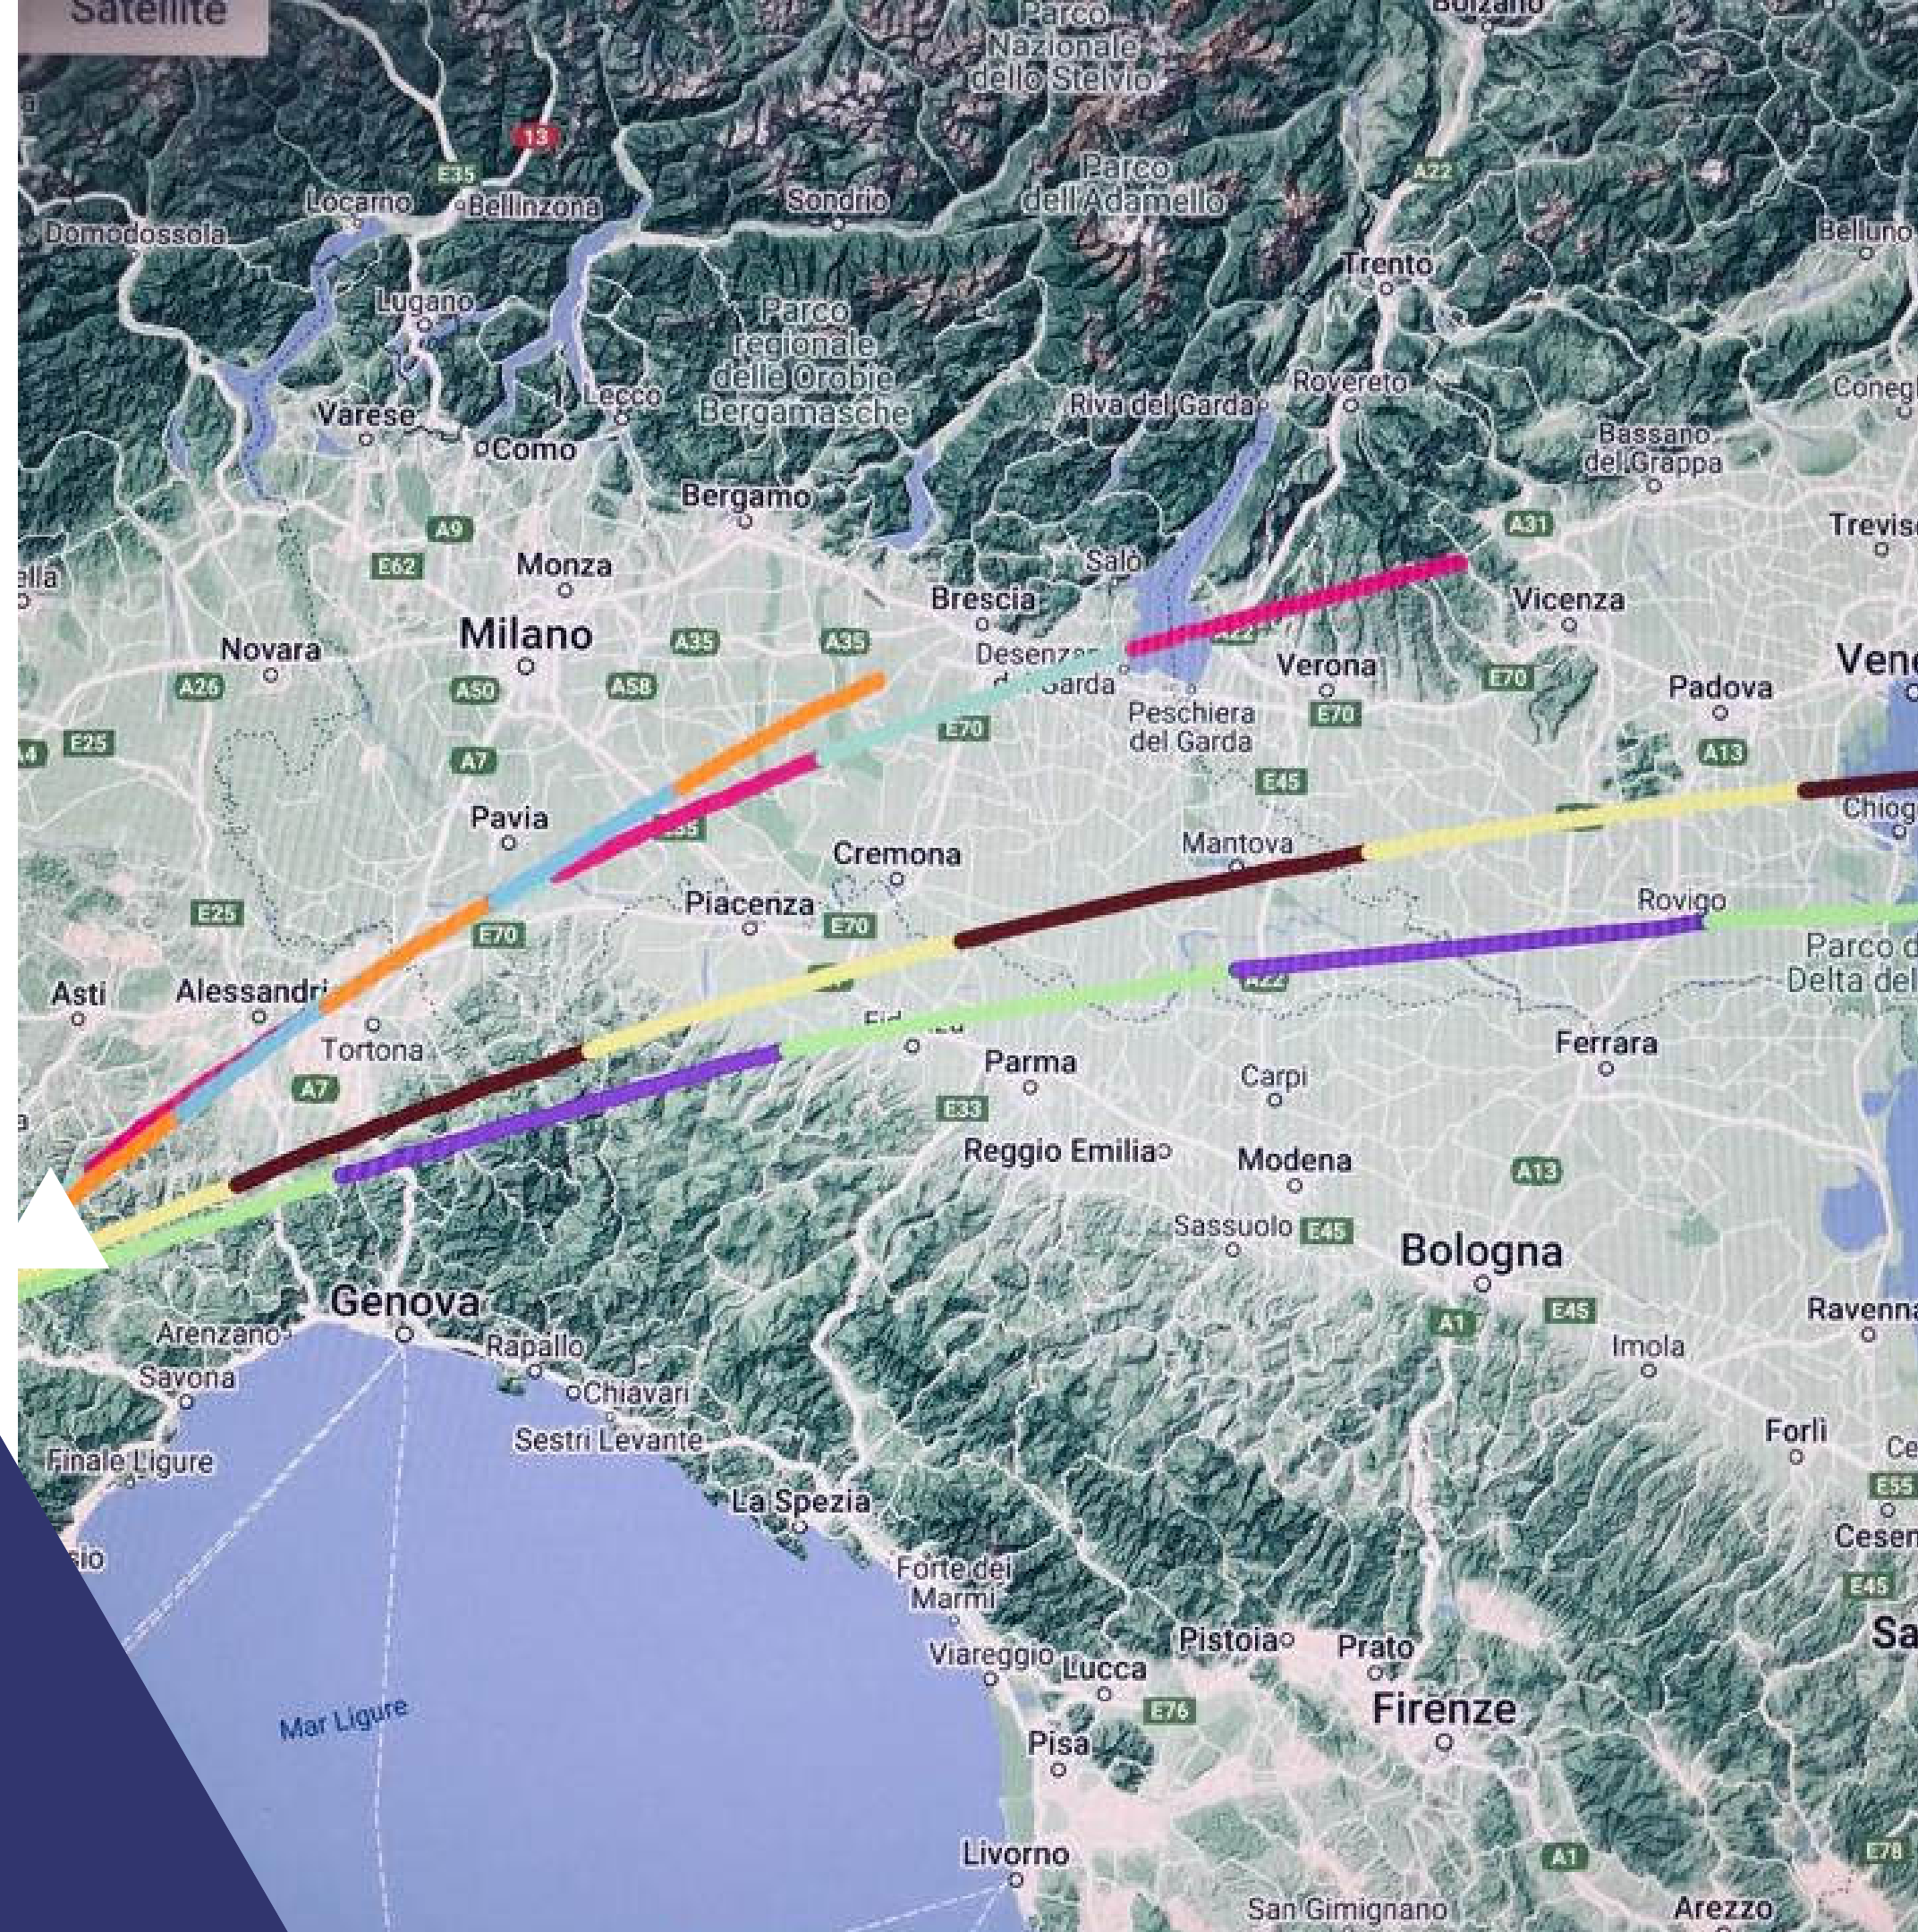

We have selected and tested a series of take-off locations in Busca and in the surrounding area, in order to guarantee an optimal flight experience with a unique landscape, with in the background the Monviso.

The main take-off is at The Ingenuity Museum park. The area is managed by the Ingenium APS Association and is equipped with an innovative realtime weather station

Other take-off points have been evaluated and chosen at the mouth of the Maira Valley or towards the plain, to take advantage of the different expected wind flows to enjoy the Monviso unique landscape or to experience your long-distance flight. In 5 hours you can land in Venice
Some take-offs are directly close the place of accommodation
